22nd World Cardiology Conference
December 11-12, 2017    Rome, Italy

Interactive Sessions    Keynote Lectures    Plenary Lectures    Workshops
Exhibitors    B2B Meetings

Speaker slots available
worldcardiology@cardiologyconference.org
Dear Colleagues, Scientists and Friends,

On behalf of the Organizing Committee, we extend a warm welcome to all of the distinguished speakers and participants of the 22nd World Cardiology Conference which is scheduled to be held during December 11-12, 2017, in the ancient and fantastic ROME to illustrate the Academic Capital of Italy and the Cultural Capital of the Planet stressing Renaissance, in particular. Building on the success of the preceding meetings, the Conference will feature a highly interactive and multidisciplinary Program including initiatives to address the entire patient-physician pathway and to look beyond the scientific topics alone.

The world is becoming increasingly vulnerable to public health challenges and risks for cardiac diseases bursts. And the Conference provides a unique opportunity for Academic leaders, educators and, clinicians as well as for experts and scholars of higher education from all over the world to con-vene and share novel ideas on crucial issues and trends in the area of cardiology. From prevention through optimal care and, finally, to targeted treatment modes and rehabilitation the whole range of cardiovascular disease will be presented with world-class faculty, researchers, and mentors as well as healthcare clinical professionals.

The Conference has been designed to provide an innovative and comprehensive overview of the latest research developments in cardiovascular medicine, primarily in the areas of personalized cardiology and cardiac surgery. The major goal will be to demonstrate recent development in prevention and prophylaxis, cardiovascular risk prediction based on risk assessment procedures. The impact of the latest biomarker-based platforms to illustrate and to monitor subclinical and/or clinical atherosclerosis, myocarditis, aortic and arterial diseases will be discussed.

The Conference will provide enough space for discussion, meetings and workshops in order to allow a close contact between speakers and visitors. Many distinguished cardiologists, cardiac surgeons and scientists will take part in this Conference. Papers will be presented in the form of plenary sessions, symposia and posters and will include superb scientific and clinical material that was carefully selected by the Review Committee. The Conference will provide the ideal forum to stimulate ideas and establish collaborations.

We do hope that you will enjoy the Conference and that your interaction with your colleagues from many different countries will stimulate a creative exchange of ideas and will be personally rewarding. We also hope and trust that you will enjoy your visit to the ancient and simultaneously modern and thus the unique and exciting city of Great Rome!
22nd World Cardiology Conference
December 11-12, 2017    Rome, Italy

Day 1 | December 11, 2017 | Monday

Registrations

Opening Ceremony

Keynote Forum

Introduction

Title: PM (Personalized Medicine) as the Newest Healthcare and Wellness Model and a Unique Way to Control and Secure Health State

Sergey Suchkov, I.M. Sechenov First Moscow State Medical University, Russia

New mechanisms in Atrial fibrillation

Guy Hugues Fontaine, Pitié-Salpêtrière Hospital, France

Alternative (hybrid-)approaches for TAVI in selected patients

Rainer Moosdorf, University Hospital Marburg – UKGM, Germany

Group Photo

Network & Refreshment Break

Sessions: Clinical Cardiology | Cardiovascular Disease | Vascular Heart Diseases

Session Chair: To be updated soon
Session Co-Chair: To be updated soon

Title: Sudden unexpected death in young athlete
Brojendra Agarwala, University of Chicago Comer children’s hospital, USA

Title: The value of “p”: Novel risk factors for Ischemic Stroke?
Juan Jose Martinez Rivas, University Los Andes, Venezuela

Title: Cardiovascular disease in kidney transplant patients
Daniela Lonèar, Clinical Center Tuzla, Bosnia and Herzegovina

Special Sessions

Title: The microcirculation involvement in the cardiovascular diseases: Focus on the capillaries
Sekib Sokolovic, Sarajevo, University Clinical Center, Bosnia and Herzegovina

Title: Study of left atrial compliance in rheumatic mitral stenosis
Richard N.W. Hauer, Netherlands Heart Institute, The Netherlands

Lunch Break

Session Cont....

Title: Women cardiovascular disease: What’s new 15-year later?
Jean-Pierre Usdin, American Hospital of Paris, France
<table>
<thead>
<tr>
<th>Title: Differential proteomic profiling of control and STEMI subjects; probable implications towards reverse cholesterol transport</th>
<th>Kamalika Roy Choudhury, CSIR-Indian Institute of Chemical Biology, India</th>
</tr>
</thead>
<tbody>
<tr>
<td>Title: Elevated level of sTLT1 is associated with risk prediction in Acute Coronary Syndrome</td>
<td>Apabrita Ayan Das, CSIR-Indian Institute of Chemical Biology, India</td>
</tr>
<tr>
<td>Title: Clinical presentation and in-hospital outcome of patients with myocardial infarction admitted in Mulago Hospital</td>
<td>Josephine Achan, Uganda Heart Institute, Uganda</td>
</tr>
</tbody>
</table>

### Network & Refreshment Break

### Special Session

**Title:** Long term effects and the congenital gap  
**Presenter:** Jay Risk, Tetralogy of Fallot Foundation Inc, USA

### Young Research Forum

**Title:** Study of left atrial compliance in rheumatic mitral stenosis  
**Presenter:** Raghav Lumb, Bharati Vidyapeeth Hospital, India

### Panel Discussions

### Day 2 | December 11, 2017 | Tuesday

### Keynote Forum

**Title:** Management of blood transfusion in cardiac surgery  
**Presenter:** Marco Picichè, San Camillo -Forlanini Hospitals, Italy

**Title:** To be updated..  
**Presenter:** Manotosh Panja, Boca Raton, Fl., USA

### Network & Refreshment Break

### Sessions: Current Research in Cardiology | Device Therapy | Case Reports

**Session Chair:** To be updated soon  
**Session Co-Chair:** To be updated soon

**Title:** Evolution of remote management of cardiac devices. From bedside to full remote control interrogation and programming  
**Presenter:** E. Martin Kloosterman, Boca Raton, Fl., USA

**Title:** Loneliness as risk factor of echo cardiography problems among adolescence of urban and rural areas  
**Presenter:** Nighat Gul, Govt. postgraduate college for women, Pakistan
Title: Novel MRI Safe Mode Selection Algorithm: a standardized real-time solution for a variable time-dependent problem.
E. Martin Kloosterman, Boca Raton, Fl., USA

Lunch Break

Sessions: Cardiomyopathy & Heart Failure | Cardiothoracic Surgery | Cardiac Imaging | Case Reports | Cardiac Nursing

Session Chair: To be updated soon
Session Co-Chair: To be updated soon

Title: The influence of Diabetes Mellitus on ECG findings during adenosine infusion as a vasodilator myocardial stress test, a comparative study to a control group
Hamid Amer, - King Abdulaziz Hospital – NGHA, Saudi Arabia

Title: Clinical outcome and prognosis of patients with acute pulmonary oedema in Singapore
Ashok Tahilyani, Tan Tock Seng Hospital, Singapore

Title: Thrombus protrusion to left main trunk by non-slip element balloon during percutaneous coronary intervention for left anterior descending artery
Takao Konishi, Hokkaido Cardiovascular Hospital, Japan

Network & Refreshment Break

Title: Efficiency of using the closed cardiopulmonary bypass contour in coronary artery bypass grafting
Damir Biktashev, NSCC, Kazakhstan

Title: Echocardiographic assessment of systolic and diastolic cardiac function and P wave dispersion in patients with psoriasis
Farbod Zahedi Tajrishi, Babol University of Medical Sciences, Iran

Title: Physical and Physiological Predictors in that influence Quality of Chest Compression in Cardiac Arrest Patients
Subhanu Roy Chowdhury, Vidyasagar University, India

Note: Tentative Program has been designed with the projected Speakers Names and Titles.
Conference Highlights

- Clinical Cardiology
- Cardiovascular Diseases
- Vascular Heart Diseases
- Current Research in Cardiology
- Cardiomyopathy & Heart Failure
- Cardiovascular Diseases During Pregnancy
- Interventional Cardiology
- Cardiovascular Surgeries
- Pediatrics Cardiology
- Diabetes, Obesity & Stroke
- Device Therapy
- Heart Regeneration
- Cardiac Nursing
- Case Reports
- Women and Cardiac Arrhythmia
- Cardiac Medications
International Collaborators

Arrhythmia Alliance
www.hearrhythmaliance.org

LONDON ACADEMY OF SPORTS AND HEALTH SCIENCES

Fundación Colombiana del Corazón Corazones Responsables

Latvijas Kardiologu biedrība Latvian Society of Cardiology

Sociedade Portuguesa de CARDIOLOGIA

International Society on Thrombosis and Haemostasis

Tourist destinations in Rome, Italy

- The Colosseum
- Castel Sant’Angelo
- Trevi Fountain
- Palatine Hill
- Piazza del Popolo
- Roman Forum
- Saint Peter’s Square
- Spanish Steps
- St. Peter’s Basilica

About Rome

Rome is a city and special commune in Italy. Rome is the capital of Italy and also of the homonymous province and of the region of Lazio. With 2.7 million residents in 1,285.3 km2 (496.3 sq mi), it is also the country’s largest and most populated commune and fourth-most populous city in the European Union by population within city limits. Its historic centre is listed by UNESCO as a World Heritage Site. Monuments and museums such as the Vatican Museums and the Colosseum are among the world’s most visited tourist destinations with both locations receiving millions of tourists a year. Rome hosted the 1960 Summer Olympics. Although associated today only with Latin, ancient Rome was in fact multilingual. In highest antiquity Sabine tribes shared the area of what is today Rome with Latin tribes. The Sabine language was one of the Italic group of ancient Italian languages, along with Etruscan, which would have been the main language of the last three kings who ruled the city till the founding of the Republic in 509 BC. Urganilla, or Plautia Urgulanilla, wife of Emperor Claudius, is thought to have been a speaker of Etruscan many centuries after this date, according to Suetonius’ entry on Claudius. However Latin, in various evolving forms, was the main language of classical Rome, but as the city had immigrants, slaves, residents, ambassadors from many parts of the world it was also multilingual.
